# VINO™ SD-WAN

VINO combines Security & Agility with broadband optimization to unlock the full potential for SD-WAN and Public Clouds

SD-WAN as a Service with Powerful WAN & Internet Optimization

VINO™ Edge

Intelligent Packet Steering & Rate-Limit

Aggregation of Multiple Underlay Links

Failover & Bandwidth Reservation

(Internet & WAN) Policy Based Traffic Shaping & Acceleration

Data Plane w/Encrypted Underlays

Control Plane

TELoIP PoP w/ Multi-Tenant SDN Controllers

SD - INTERNET
Next Generation Internet

SD - WAN
Customer Protected Route Domain

WiFi & Data VLANs

Voice VLAN (DHCP & LLDP-MED)

VINO Edge Devices
From 50Mbps to 1Gbps+

VINO goes 10x Faster than MPLS for Half the Cost

✓ Nationwide reach & scale to serve customers from 1 - 1000+ locations

✓ Patented optimization boosts the quality & reliability of low-cost broadband circuits to MPLS levels

✓ Versatile SD-WAN deployment options ranging from MPLS hybrids to full MPLS replacement

Cloud Managed Branch Orchestration with no on-site IT required

Orchestration

✓ Zero Touch Provisioning ensures remote sites can be installed in minutes by unskilled staff

✓ Single-pane-of-glass ensures that problems are pin pointed and fixed BEFORE they become an issue for your users
