

RICi-E1, RICi-T1

Fast Ethernet over E1/T1 Intelligent Converters

- Wire-speed packet forwarding
- 4 levels of QoS, based on four VLAN priority queues in accordance with 802.1p and IP Precedence
- Inband and out-of-band management access via ASCII terminal, Web browser, Telnet, or SNMP
- Plug-and-play using DHCP client
- VLAN stacking and tagging, keeping Ethernet user traffic completely separate from management data, while maintaining user VLAN settings intact

RICi-E1 and RICi-T1 are intelligent converters connecting Fast Ethernet LANs over full or fractional E1 or T1 circuits. They enable service providers and ISPs to supply transparent Ethernet services, without interfering with user traffic.

MARKET SEGMENTS AND APPLICATIONS

RICi-E1 and RICi-T1 can be used to provide services and carrier backhaul applications over low and high-speed SDH/SONET and PDH circuits, from fractional and full E1/T1 or E3/T3 over STM-1/STM-4 to Gigabit Ethernet.

ETHERNET

RICi-E1 and RICi-T1 are equipped with one E1/T1 port and one 10/100BaseTx port. Packets are forwarded from the Ethernet network to the TDM network at wire-speed, fully utilizing the expensive TDM circuit bandwidth.

The VLAN Priority bits (802.1p) and IP Precedence priority schemes enable users to define four different QoS levels, according to the application requirements.

The Fast Ethernet bridge handles 1800-byte frames, supporting VLAN applications and other protocols requiring large frame sizes. In filter mode, the bridge learns MAC addresses and filters local traffic, and in transparent mode it forwards any received packet.

VLAN stacking is used to tag direct user and management traffic to different VLANs, thus preserving the user LAN settings, fully separating user traffic from management data.

The DHCP client automatically obtains the IP address, the IP mask and the default gateway, minimizing installation time.

RESILIENCY

The units feature fault propagation. When a TDM link failure is detected, RICi-E1 and RICi-T1 close the user port.

RICi-E1, RICi-T1

Fast Ethernet over E1/T1 Intelligent Converters

MANAGEMENT AND SECURITY

The device is managed inband via the Fast Ethernet user ports or remotely via the TDM port. The device may be accessed via Telnet, a Web browser, or SNMP (for RADview-Lite). Management traffic and user Ethernet traffic transmit in the same Ethernet flow, separated by different VLANs. Local out-of band management is provided via an ASCII terminal.

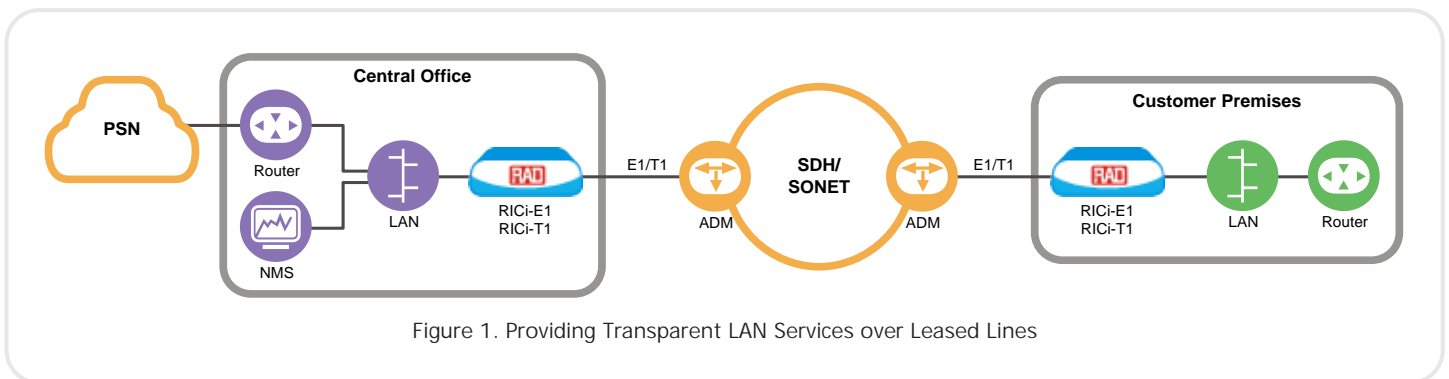

MONITORING AND DIAGNOSTICS

Remote loopbacks are used for troubleshooting on the physical layer.

A built-in ping utility checks IP connectivity by pinging remote IP hosts.

A trace-route application quickly traces a route from RICi-E1 or RICi-T1 to any other network device.

Applications

Specifications

WAN PROTOCOL

GFP (G.8040, G.7041/Y.1303)

RAD proprietary HDLC compatible with
RAD products
Industry-standard HDLC

ETHERNET INTERFACE

Number of Learned MAC Addresses

Up to 512

Type

10/100 Mbps autonegotiation, full/half duplex

Compliance

Conforms to the relevant sections of IEEE 802.3 and 802.3u

Connector

RJ-45

E1 INTERFACE

Number of Ports

1

Compliance

G.703
G.704

Data Rate

2.048 Mbps

Line Code

HDB3, AMI

Framing

Unframed
Framed: G.732N

Max Frame Size

1800 bytes

Line Impedance

120W, balanced
75W, unbalanced

System Clock

Internal or loopback

Diagnostics

Remote loopback

Connector

RJ-45

T1 INTERFACE

Number of Ports

1

Compliance

ANSI T1.403

Data Rate

1.544 Mbps

Line Code

B8ZS, AMI

Framing

Unframed
Framed: D4 or ESF

Max Frame Size

1800 bytes

Line Impedance

100W, balanced

System Clock

Internal or loopback

Diagnostics

Remote and FDL loopbacks

Connector

RJ-45

MANAGEMENT

SNMPv1

GENERAL

Indicators

PWR (green) – Power status
TST (yellow) – Test status
ALM (red) – Alarm status
LOS (red) – Loss of signal
ETH LINK (green) – Ethernet link status

Power

Wide-range power supply:
AC/DC: 100 to 240 VAC
or 48/60 VDC (40 to 72 VDC)

DC: 24 VDC (available only with temperature-hardened metal enclosure)

Power Consumption

5W

Physical

Plastic enclosure:

Height: 43.7 mm (1.7 in)

Width: 220 mm (8.6 in)

Depth: 170 mm (6.7 in)

Weight: 0.5 kg (1.1 lb)

Metal enclosure:

Height: 43.7 mm (1.7 in)

Width: 215.5 mm (8.5 in)

Depth: 152.5 mm (6.0 in)

Weight: 0.58 kg (1.28 lb)

Environment

Temperature:

Regular unit:

0° to 50°C (32° to 122°F)

Temperature-hardened version:

-22° to 70°C (-7.6° to 158°F)

Humidity: Up to 90%, non-condensing

RICi-E1, RICi-T1

Fast Ethernet over E1/T1 Intelligent Converters

Ordering

RECOMMENDED CONFIGURATIONS

RICi-E1

Fast Ethernet converter over balanced E1 interface

RICi-E1/U

Fast Ethernet converter over unbalanced E1 interface

RICi-T1/H

Fast Ethernet converter over T1 interface, temperature-hardened plastic enclosure

SPECIAL CONFIGURATIONS

Please contact your local RAD partner for additional configuration options

SUPPLIED ACCESSORIES

AC power cord

DC adapter plug

CBL-RJ45/2BNC/E1

Interface adapter for converting a balanced E1 RJ-45 connector to a pair of BNC unbalanced coaxial connectors

Note: The CBL-RJ45/2BNC/E1 cable is supplied with the unbalanced E1 option.

OPTIONAL ACCESSORIES

CBL-DB9F-DB9M-STR

Control port cable

RM-33-2

Hardware kit for mounting one or two units in a 19-inch rack, for units with plastic enclosures

RM-35/@

Hardware kit for mounting one or two units in a 19-inch rack, for units with metal enclosures

@ Rack mounting kit type:

P1 Kit for mounting one unit

P2 Kit for mounting two units

WM-35

Hardware kit for mounting one unit on a wall, for units with metal enclosures
