FreeSBC™

A New Approach to the Session Border Controller

A feature rich, high-performance and easy to use virtual session border controller from TelcoBridges

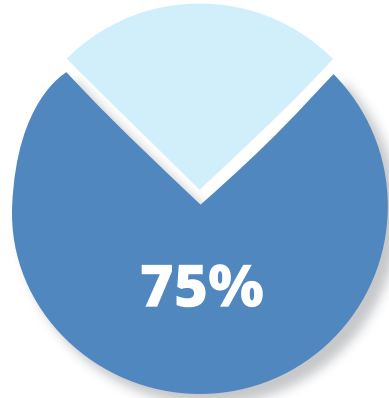

Pulse Supply
909 Ridgebrook Road Sparks, MD 21152 USA
Tel: +1.410.583.1701 sales@pulsesupply.com www.pulsesupply.com

The business model for communications software is changing

FROM	TO
Hardware-centric CAPEX	→ Software-centric OPEX
Large up-front costs	→ Pay-as-you-grow
Maintenance and Upgrade Fees	→ Software subscriptions with support and automatic upgrades
"Buy to Try"	→ Download Free evaluation software

Leading analysts agree that the market is shifting to virtualized and cloud-based SBCs

Over 75% of SBC deployments will be virtual or cloud-based by 2022 (according to Exact Ventures)

TelcoBridges has a new approach, changing the way Session Border Controller software is being deployed and sold with a new business model and market approach:

- PRO edition with enhanced features, regular updates and vendor support
- Annual subscription-based pricing "Pay as you grow"

FreeSBC by TelcoBridges Benefits:

- Carrier-grade Session Border Controller software
- Feature rich with service provider and enterprise features
- High-performance and compact, supporting up to 60,000 sessions/server
- Flexible deployment options with virtualized, cloud and VNF versions
- Can be deployed as a VNF on uCPE, on AWS, or on VMware, KVM/ OpenStack, or bare-metal servers
- Immediate software download with online activation and payment
- The product benefits from over 10 years of experience in SIP communications software development
- The FREE edition includes all the basic SBC functions
- PRO edition subscriptions are \$1/session/server/year (see page 4 for details)
